

at HQ Bldg --or an automatic stamp dispensing & package mailing station

PRESENT METHOD

Approved For Release 2001/05/23 : CIA-RDP86-00244R000300210004-7

Commercial stamp dispensers at blindmen's stands at cost of 25¢ for 20¢ worth of stamps. This is 20% profit. We are captive consumers. Two of the blind men have told me these machines are not worth the trouble they cause at a profit to them or less than one cent per 25¢ purchase.

(I do think a Post Office substation or machine can be justified as much as the barbershop --without equivalent costs.)

I SUGGEST that CIA officially request from the Post Office Dept. a sub-station or an automatic stamp-dispensing and package-mailing machine - to be put in Headquarters Building at a convenient central location.

Since we are a U. S. Government installation and since we are a large group of people far from a convenient post office, I feel it is our right as U. S. citizens to have this service from the Post Office Dept. ... at the very least a non-profit stamp dispensing machine!

Advantages

CONVENIENCE in accessibility to stamps and package-weighing & mailing.

SAVES TIME away from desks by elimination of need for employees to travel to

Maclean for nearest post office during work week.

ADVANTAGES

ELIMINATES UNFAIRNESS of paying 20% profit in a Govt building for a Govt service.... just because our building is isolated.

SAVES MONEY for individual employees.

ELIMINATES IRRITATION.
